

Manufactures and Installers of:

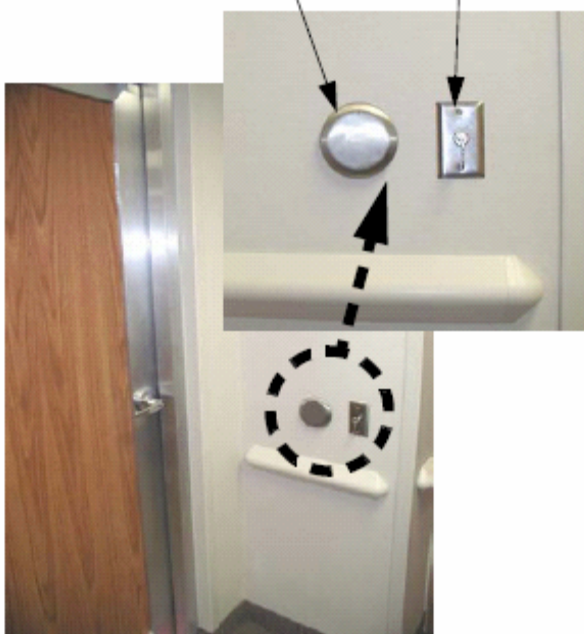

- MRI / RF Shielded Enclosures
- Linear Accelerator Doors and Vaults
- X-Ray Imaging Products
- Unistrut Support Systems

Introducing the new Automatic Opening/Closing Door with Automatic Latching System* for RF-shielded enclosures.

- One touch of the Door Actuator opens and closes the door.
- Actuators can be mounted in the Control Room and near the door for easy access.
- RF seal is made with Acoustic Fabric-Over-Foam Gasket Material that does not break like copper finger details.
- Technicians can easily enter and exit the shielded enclosure.
- Door and frame STC-rated up to the mid-40 range.
- Consistent EMI Shielding performance over 100 dB.

Door Actuator Electric Key Switch

THE AUTOMATIC DOOR FEATURES:

- LCN Auto-Equalizer Model 4640 with adjustable speed
- Automatic Latching System* that ensures a tight RF seal
- Electric Key Switch for deactivating the Door Opener
- Fabric-Over-Foam RF Gasket that does not oxidize or break like tin-plated copper fingers
